

TRY IT!

COMPLETE STREETS

Redesign a city street!

1. Consider street safety and traffic and select your road lanes

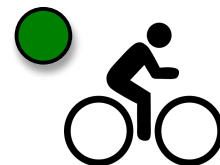

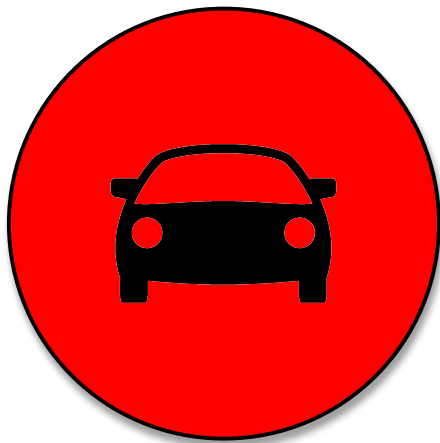

CAR: Dedicated for cars or shared with all vehicles

BUS: Dedicated lanes speed up traffic and make roads safer

BICYCLE: Dedicated lanes are safer and encourage cycling

MEDIANS: protect lanes, add green space, and help traffic flow

2. Consider the carbon footprint of different transportation options and select your vehicles

Can you redesign a city street to get everyone to work while staying safe, fast, and keeping Pittsburgh's carbon footprint low?
